E-learning Content Development Services

We create fascinating E-learning content that caters to the comprehensive learning needs of corporates. With appropriate tools, we aim to make learning fun and purposeful to increase knowledge retention levels.

Video Learning

We create industry-specific video learning courses to grab learner's attention through engaging content.
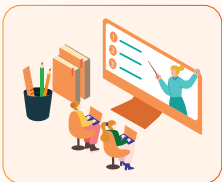

Translation and Localization

Our extensive translation services in Local/International languages aid multilingual learners in rendering translations of texts and videos in a language of their preference.

Microlearning

Our highly efficient bite-sized training modules, incorporated with rich graphics and animations, help learners to understand the concepts instantly.

Gamified Learning

We impart gamified elements, challenging scenarios & stories to enrich the learning experience while increasing the learner's knowledge retention level.

Scenario Based Learning

With Novac Learning's scenario-based training module, learners can experience situated learning in a digital environment, where they can decide their path based on the choices.

Immersive Learning

Immersive simulated learning environments have proven to be an effective method which increases the skill levels of learners through a wide range of visual scenarios. Novac can help you create an interactive and simulated/artificial learning environment for your workforce.
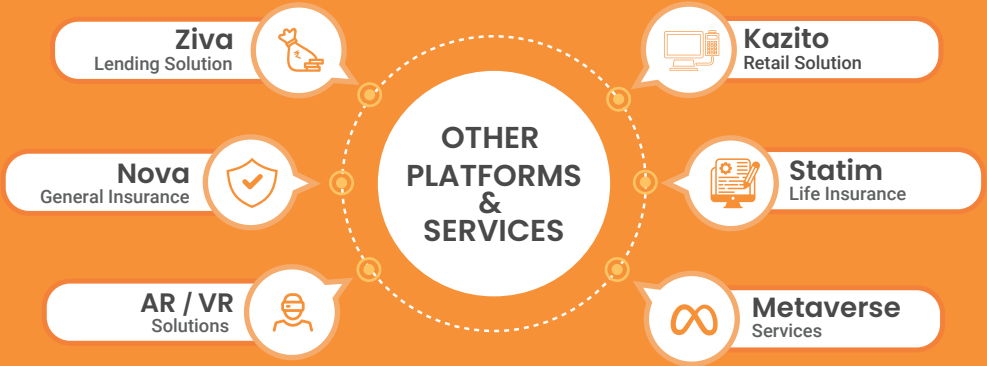

Explore Our Immersive Content Forms:

360° Videos: Unleash the potential of 360° videos to create product demonstrations, virtual walk-through and webinars

Virtual Reality: Allow users to virtually experience products and services with recreated virtual worlds to cater any learning objective

Augmented Reality: Extend the reality by embedding vital learning content to create memorable learning experiences

Mixed Reality: Virtual Reality and Augmented Reality synchronized to create Mixed real time experiences by fusing the digital and real world reality
